MEMBER OF ANZIIF

1,200 olive growers.

1.8 million hectares of forest.

THOUSANDS OF GROWERS. ONE SPECIALIST BROKER.

474,000 tonnes of pipfruit.

142,000 tonnes of grapes.

AgriRisk is the only broker in New Zealand that specialises in insurance for agribusiness. For almost 20 years, specialist staff based in Auckland and Sydney have remained focused on providing advice and insurance to primary producers, rural supply chain businesses and Managed Investment Schemes across the country.

AgriRisk specialises in crop protection insurance for the pipfruit, forestry, olive, horticulture and viticulture industries as well as cover for businesses in the supply chain reliant on primary production.

With an established international reputation for broking, product design, independent risk consulting and in-house agronomic expertise, AgriRisk is uniquely positioned to offer clients a range of skills and services. AgriRisk is focussed on tailoring and building insurance products to suit the particular needs of agriculture — and if there is no 'off the shelf' product available, one will be designed to suit your needs.

PIPFRUIT, OLIVES, KIWIFRUIT, FORESTRY, GRAPES, VINES, FRUITING TREES

BEYOND CROP PROTECTION.

Although a crop protection specialist, AgriRisk has also gained an international reputation for designing products to cover complicated and specific insurance requirements. This has included income protection for quality downgrades and insurance to protect niche crops and businesses in the supply chain.

Consulting to the World Bank, the Food and Agriculture Organisation and the governments of Australia, Thailand, Argentina, Vietnam and the Philippines, AgriRisk has established itself as a leading provider of insurance related products and services throughout the Asia-Pacific region.

THOUSANDS OF CLIENTS. NO TWO POLICIES THE SAME.

AgriRisk's clients are located throughout New Zealand and range from small farms to corporate enterprises, rural investors, supply chain businesses, government and Managed Investment Schemes.

Every business has individual insurance requirements and therefore, at AgriRisk, no two policies are the same. AgriRisk will spend time getting to know your business, defining insurance objectives and understanding how insurance is expected to perform in the event of a loss.

Each policy is then structured according to the particular requirements of the business. AgriRisk has access to flexible products and a track record of showing great innovation in structuring the appropriate insurance solution for its clients.

A KNOWLEDGEABLE TEAM.

AgriRisk's New Zealand team has extensive experience in agriculture, unrivalled product knowledge and is dedicated to providing quality personal service to its clients. Your Account Manager will provide honest and expert advice, look for better ways to structure your insurance and encourage a regular review of your insurance position, because it makes good business sense. Staff also take the time to meet their clients face to face, every year.

3,000 CLAIMS. NO DISPUTES.

In the event of a loss, AgriRisk acts on its clients behalf to facilitate a simple, accurate and efficient claims process using specialist agricultural loss adjusters. In almost 20 years AgriRisk has facilitated the payment of a variety of claims and over \$200 million has been paid to their clients — with not one reaching litigation.
